Work Experience

Dominion Energy

Richmond, VA

Software Engineer · June 2026 - Present

- Support daily operations of the System Operations Center (SOC) for Dominion Energy's electric transmission system.
- Customize and extend the GE Habitat Energy Management System (EMS) to meet operational needs.
- Perform system and server maintenance to keep critical operational systems reliable and available.
- Work extensively through Windows virtual machines in a secured, NERC CIP-regulated environment.
- Technologies include: GE Habitat EMS, SCADA, CIM, Red Hat Enterprise Linux (RHEL), Bash, Perl, PowerShell, PuTTY, Windows VMs

CODE Plus, Inc.

Fort Gregg-Adams, VA

3D Developer · November 2023 - May 2026 · 40 Hours/Week

- Utilized Unity Pro 2019 and Unity Pro 2023 to design and develop Interactive Multimedia Instructions for the United States Army.
- Collaborated with Subject Matter Experts to gamify complex subject material, enhancing learner engagement and knowledge retention.
- Optimized for WebGL builds on low-end PCs, as well as standalone virtual reality (VR) experiences for Meta Quest 3, delivering high-performance results across diverse platforms.
- Procured, modified, and created 3D art assets suitable for use in three-dimensional (3D) simulations in synthetic environments.
- Technologies include: Unity, C#, Meta Quest 3, Autodesk Maya, Adobe Photoshop

Luna Wolf Studios

Newark, DE

Unity Game Developer · August 2022 - April 2023 · 40 Hours/Week

- Collaborated with healthcare providers and audiologists to develop a hearing test in virtual reality (VR) using Meta Quest 2.
- Vetted, procured, and integrated Unity assets and frameworks to accelerate development.
- Designed, developed, and delivered fully functional application within a tight deadline.
- Created a suite of unit tests to validate and regression test algorithms.
- Performed clinical trials on 50 subjects, comparing the efficacy of the virtual reality application to traditional hearing tests with positive results.
- Technologies include: Unity, C#, Meta Quest 2

QVC

West Chester, PA

Software Engineer · January 2018 - September 2020 · 50 Hours/Week

- Developed and maintained back-end integration services that were responsible for product, employee, and order data.
- Conducted code reviews and debugging to ensure high-quality code and optimal system performance.
- Utilized a continuous integration/continuous deployment (CI/CD) pipeline to deploy applications into a containerized environment.
- Advocated for Agile methodologies and tools, balancing business needs with software development practices.
- Technologies include: Java, Spring Framework, Tomcat, Docker, MS SQL Server, Linux, Git

Projects

HELIX *Unity, C#, Meta Quest 2* <https://lunawolfstudios.com/helix/>

A modern rendition of traditional hearing tests, leveraging virtual reality in order to immerse players for the duration of the test. State of the art audiometers were used to calibrate the audio assets to ensure accurate test results. Features a bongo rhythm game to assess the player's hearing capability through a range of frequencies, as well as a digits-in-noise escape room experience that tests the player's speech recognition capabilities with competing background noise.

4TONS *Unity, C#* <https://crooked-studio.itch.io/4tons>

A 2D rogue-like action RPG with puzzle elements. Play as a wizard trapped in a mysterious dimension who must fight their way through the 4 Towers of Nerd Storm. On their journey, players must build their arsenal of weapons and abilities to defeat hordes of enemies. Features fast-paced combat, procedurally generated dungeons, and a robust component-based AI system.

Drift Space Zero *Unity, C#* <https://tetricomstudios.itch.io/drift-space-zero>

A multiplayer zero-gravity 6DOF racing game. Utilized Unity Rigidbody physics to create a difficult-to-master spaceship controller. Segments of pipes are assembled in a random order and orientation for a fresh experience with every race. A shader was utilized to present the illusion that the track was being assembled in real time.

Education

Wilmington University

New Castle, Delaware

BS Game Design and Development · GPA: 3.51 · Sep 2013 - Aug 2017
